VJTI Mumbai: Internship Guidelines & Application Policy (2025-26)

Based on the official Training and Placement Office (TPO) guidelines and college protocols, internships are a core part of the experiential learning at VJTI.

1. Eligibility & Duration

Internships are primarily targeted at pre-final year students to bridge the gap between academic theory and industrial practice.

- **B.Tech (Third Year):** Eligible for Summer Internships. Duration is typically **60 days** (May–July).
- **M.Tech (Second Year):** Eligible for long-term internships. Duration can extend up to **11 months**.
- **MCA (Third Year):** Eligible for a **6-month** internship (usually in the final semester).

2. Application Process

Students can secure internships through two main routes:

Route A: On-Campus (TPO Portal)

1. **Notification:** The TPO posts internship openings from visiting companies on the **Superset portal** or the TPO notice board.
2. **Registration:** Interested students must sign their willingness by registering for the specific company on the portal.
3. **Selection:** Companies conduct their own selection process (Tests/Interviews). Results are declared by **11:59 PM** on the same day.
4. **Acceptance:** Once an offer is made, the student must accept it by the end of the day.

Route B: Off-Campus (Self-Arranged)

1. **Permission:** Students can find internships independently but must obtain a **Recommendation Letter** from their Head of Department (HoD).
2. **Verification:** The TPO verifies the credentials of the industry/organization before giving final consent.
3. **Reporting:** After selection, the student must inform the HoD and TPO of the duration and terms.

3. Key Internship Policies

To ensure fairness, the TPO enforces strict rules regarding internship offers:

- **One Student, One Internship Offer:** Once a student is offered an internship through the TPO, they are removed from the process and cannot apply for other internship roles.
- **The Blacklist Rule:** If a student rejects an on-campus internship offer to take an off-campus one, they will be **blacklisted** from the final placement drive in their final year.
- **Academic Overlap:** Internships must **not** clash with academic activities or exams. The academic section does not permit leaves for internships that overlap with the official academic calendar.
- **Mandatory Credits:** For B.Tech students, a minimum of **six weeks** of internship is mandatory during the third year to earn necessary academic credits.

4. Pre-Placement Offers (PPO)

An internship often leads to a full-time job offer (PPO).

- **Binding Nature:** A PPO, once issued and accepted, counts as the student's first placement offer.
- **Timeline:** Companies are requested to release PPOs by **mid-July**, before the final placement season starts in the third week of July.
- **Betterment:** B.Tech students with a PPO can still apply for **one** "Betterment" offer if the new company is in a higher tier (Dream/Super Dream).
